## Document Scope

This document is produced from the live AIMS database and is a representation of the configuration of AIMS and related objects.

### Contents

Section Title	Description	Link
Facility Listing	Lists all of the current Facility classes which are valid in AIMS. Where produced, contains links to the controlled AD4 documents for each class held in eB.	<a href="#">Link</a>
Primary Functional Unit (PFU) Listing	Lists all of the current PFU classes which are valid in AIMS. Where produced, contains links to the controlled AD4 documents for each class held in eB.	<a href="#">Link</a>
Locational Functional Unit (LFU) Listing	Lists all of the current LFU classes which are valid in AIMS. Where produced, contains links to the controlled AD4 documents for each class held in eB.	<a href="#">Link</a>
Functional Unit (FU) Listing	Lists all of the current FU classes which are valid in AIMS. Where produced, contains links to the controlled AD4 documents for each class held in eB.	<a href="#">Link</a>
L Class Listing	Lists all of the current L classes which are valid within AIMS. Where produced, contains links to the controlled AD4 documents for each class held in eB.	<a href="#">Link</a>
Functions Listing	Lists all of the current function codes which are valid in AIMS. Where produced, contains links to the controlled AD4 documents for each function held in eB.	<a href="#">Link</a>
Supporting Documents	List of Documents which support the ADD and the general Asset information collection process.	<a href="#">Link</a>
